

FACTSHEET

STAYING SAFE FROM THE DANGER OF CARBON MONOXIDE

It's critical that appliances in the home do not leak carbon monoxide. These appliances, such as boilers, gas fires, chimneys and flues should be serviced by a registered engineer and an alarm should be fitted in the same room as the appliance.

1

SERVICE AND MAINTAIN YOUR APPLIANCES

2

MAINTAIN CHIMNEYS AND FLUES

3

INSTALL A CARBON MONOXIDE ALARM

4

BE AWARE IF YOU FEEL SICK, DIZZY, SHORTNESS OF BREATH OR HEADACHE
